Professional Experience

Associate Professor	Texas A&M University	2018-Present
Assistant Professor	Texas A&M University	2015-2018
Assistant Professor	Arizona State University	2012-2015
Fixed-Term Lecturer	Pennsylvania State University	2011-2012
Graduate Teaching Fellow	Pennsylvania State University	2005-2011

Education

PhD, English	Pennsylvania State University	May 2011
Dissertation: <i>Transhumanism: Evolutionary Logic, Rhetoric, and the Future</i> Committee: Richard Doyle (Director), Jeffrey Nealon, Mark Morrisson, Robert Yarber.		
MA, English	Pennsylvania State University	May 2007
BS, Computer Science	Georgia Institute of Technology	May 2005
BS, Science Technology & Culture	Georgia Institute of Technology	May 2005

Current Book Projects

Immutability: The World According to Software Bugs

Six Chapter Manuscript, In-Progress – This project is a media archeology of the computer bug. While numerous works explore computer hacking, my project is interested in accidental computer failure: unintended consequences that can have dangerous and far-reaching effects. I uncover that the accident is integral to software while mitigating this accidental nature has radically altered the landscape of contemporary culture. Planned chapters trace the software accident through the early mathematical foundations of computing, the 1990s emergence of home computing and the Internet, the collapse of post-structural thought and the related rise of infrastructure studies, recent changes in programming practices resulting from big data, and current discussions about the programmatic nature of reality itself.

Publications

Books

Humans at Work in the Digital Age: Forms of Digital Textual Labor

14-Chapter Edited Collection, Co-Edited with Shawna Ross, Routledge (2019) – This edited collection explores the roots of twenty-first century cultures of digital textual labor, mapping the

diverse physical and cognitive acts involved, and recovering the invisible workers and work that support digital technologies. [Table of Contents Online at Routledge](#)

Transhumanism: Evolutionary Futurism and the Human Technologies of Utopia

Six-Chapter Manuscript, University of Minnesota (2017) – This book explores the rhetorical history of “evolutionary futurism,” a twentieth century Utopian rhetorical mode associating advancing telecommunications technologies with biological evolution to suggest near-future radical shifts in human existence and cognition. Tracing this rhetoric of transhumanism, chapters explore the evolutionary futurism of theosophy, 1940s science fiction, Raymond Kurzweil, and Pierre Teilhard de Chardin. In addition to a theoretical introduction, the book also contains an extended discussion of contemporary digital aesthetics as transhuman vectors of evolutionary overcoming.

Prizes: 2017 Science Fiction and Technoculture Studies Book Prize

Reviews: *Modernism/Modernity* (25.1), *Configurations* (26.4), *Contemporary Political Theory*, *Science Fiction Studies* (46.1)

Articles & Chapters

“**Teaching Science Fiction as Media Archaeology**” in *Science Fiction in the Literature Classroom*. Ed. Gerry Canavan. (collection accepted by MLA).

Teaching Experience (58 Sections; 24 Courses; 1607 Students)

Texas A&M University (32 Sections; 13 Courses; 683 Students)

Graduate Seminar: Studies in Genre (1 Section; 10 Students) – Taught as “Science Fiction and the Man-Machine” (Spring 2023).

Graduate Seminar: Topics in Digital Research (1 Section; 10 Students) – Taught as “Software Studies” (Spring 2021) which focused on the history and criticism of software cultures especially in the 1980s and 1990s.

Senior Seminar (3 Sections; 54 Students) – Topic-driven course for graduating seniors. Topics include: “Is Writing a Fad?” (Spring 2019), “Gender and Science Fiction” (Spring 2021), and “Cyberpunk: Fact and Fiction” (Fall 2022).

Science Fiction (4 Sections; 157 Students) – Course teaches the history of science fiction from the pulp era to the present, with a focus on the interchange between technology and fictional representation and the development of SF as a publishing industry.

Independent Study (1 Section; 1 Student) – Taught in Fall 2018 as “Writing About Science.”

Approaches to English Studies (1 Section; 25 Students) – Taught in Spring 2018 as “Cyberculture,” which introduced the English major through topics such as humanities computing, science fiction, and speculative design.

Graduate Seminar: Topics in Rhetoric and Composition (1 Section; 8 Students) – Taught in Spring 2018 as “Infrastructure Tales,” which explored the intersection between infrastructure studies and narrative as a key site for future and emerging theories of rhetorical practice.

Digital Authoring Practices (3 Section; 30 Students) – I developed and first taught this class for A&M. The course is designed to introduce students to the technologies of digital writing while asking them to formulate artifacts using computational artifacts.

Rhetoric of Style (3 Section; 80 Students) – Course documents the relationship between style and persuasion, with an emphasis on sentence analysis, tropes & figures, and classical rhetorical style exercises.

Graduate Seminar: History and Theory of Rhetoric since 1800 (1 Section; 6 Students) –

Taught in Fall 2016 as “Rhetoric’s Avant-Garde,” which focused on the intersection between avant-garde writing practices and developments in rhetorical theory during the twentieth century.

Graduate Directed Study: History and Theory of Rhetoric (1 Section; 2 Students) – Graduate directed reading focusing on the history of rhetoric from ancient Greece through the Enlightenment *and* contemporary articulations of those concepts in rhetoric of science, rhetorical historiography, procedural rhetoric, and minority rhetorics.

History of Rhetoric (4 Section; 100 Students) – Focus on the history and development of rhetorical concepts from the ancient Greeks through the Enlightenment.

Modern Rhetorical Theory (8 Section; 200 Students) – Course focuses on the developments of rhetorical theory in the 20th century. Course emphasizes mutations in media and globality as preconditions for the flowering of rhetorical thought that mark our world.

Arizona State University (10 Sections; 6 Courses; 280 Students; 7 Online Sections)

American Literature From 1860 (1 Section; 24 Students) – In this born-digital approach to the literary survey, students learn the history of American literature since 1860 while exploring digital methods of textual analysis.

Frankenstein and His World (1 Section; 30 Students; Online Course) – In this course, students will read Mary Shelley’s *Frankenstein* in conversation with the texts that both influenced it and were influenced by the novel. Students also complete projects and papers on this cultural legacy.

Major American Novels (2 Section; 46 Students) – Course covering major works of the American novel. Additionally, students will complete assignments deploying thematic, stylometric, and mapping-based approaches to the study of literature in a project-oriented exploration American literary history.

H.P. Lovecraft: Style, Science, Myth (2 Section; 60 Students; Online Course) – In this course on the horror fiction of H.P. Lovecraft, students use digital humanities methods to complete projects dealing with Lovecraft’s unique style, interest in science, and contemporary mythology.

Introduction to Contemporary Fiction (3 Section; 90 Students; Online Course) – Course introduces students to the current state of American fiction by focusing on novels published by living authors within the last three years.

Popular Cultural Issues: Apocalypse Now? (1 Section; 30 Students; Online Course) – Course asks students to think critically about the continuing popularity of post-apocalyptic and end-of-the-world narratives in contemporary literature, film, and television.

Pennsylvania State University (16 Sections; 5 Courses; 644 Students)

Rhetoric & Composition (6 Sections; 144 Students) – This first-year composition option at Penn State introduces students to college writing, critical thinking, and basic rhetorical theory.

Effective Writing: Technical Writing (7 Sections; 168 Students) – Advanced composition class for students in science and engineering fields. Focus on document design, readability, and technologies of communication.

Effective Writing: Business Writing (*2 Sections; 48 Students*) – Advanced composition class for students in business fields. Focus on effective and ethical communication, document design, and branding.

Science Fiction (*2 Sections; 200 Students*) – Course focusing on the history of science fiction in the 20th and 21st centuries. This large lecture class, composed mostly of non-majors, highlights the ongoing relationships between science, literature, and imagined futures.

Introduction to Critical Reading (*1 Section; 24 Students*) – Introductory class focusing on research methods and critical approaches within the English major. Specifically, instruction focused on media theory and critical appraisal of cultural texts.
